CYBERWHITE
DIGITAL SECURITY CONSULTANTS

Overview

Today, businesses are expected to be more agile and dynamic, to deliver added value and of course, increased competitive advantage.

In the background, the cyber threat landscape continues to increase and evolve.

This presents a myriad of new challenges, all of which are designed to limit the effectiveness of business through either interruption of service, fraud or theft of information.

This is why it's reassuring to know that you can rely on the team of highly qualified security experts at CyberWhite.

A team that can support and advise you every step of the way. A team that become part of your team and are interested in protecting your business as if it were their own.

CYBER ASSISTANCE PROGRAM

Delivering innovative support solutions.

The Cyber Assistance Program (CAP) offers you a cost-effective way of increasing your security knowledge base without the need to invest in additional staff.

By engaging CyberWhite, you gain access to a wide variety of subject matter experts with skills ranging from governance, risk and compliance, vulnerability management and penetration testing through to technical security architects, all supported by our own in-house project management team.

The CyberWhite security experts can be called on at any time to deliver anything. This includes ad-hoc advice on something as simple as patching through to the delivery of larger scale projects such as ISO27001:2013.

DIGITAL SECURITY CONSULTANTS

Project Management

Each CAP is supported by a detailed project management plan.

At the start of each engagement we map the contract and agree the timescales, milestones and key deliverables.

Once the contract commences, you will be provided with a link to our secure area where you can track time used and view scheduled days.

You can also upload files for us to review.

This secure area provides a confidential way to engage and track progress without using email.

Once a contract concludes, you can download all of the documents. For security, ninety days after the contract expires, we delete everything.

BESPOKE SECURITY SUPPORT

Each Cyber Assistance Program (CAP) is unique.

The items included are designed to encompass the areas that are important to you. The services will be aligned to your risk and organisational risk appetite.

The portfolio of services is bespoke and designed to provide assurance that you have access to subject matter experts in the fields of information security, data security and cyber security for all areas of your business.

Each contract is valid for a period of 12 months or until such time as the days have been fully utilised, whichever occurs first.

CAP's are available as either Cyber 1 – 36 days, Cyber 2 – 48 days or Cyber 3 - 72 days. Please speak to your account manager to find out which option is most suitable for you.
